Grindmaster-Cecilware™ Thailand Plant Finishes Outstanding Year

Louisville, KY — Grindmaster-Cecilware Corporation announced outstanding results for its manufacturing facility located in Rayong, Thailand. Grindmaster-Cecilware's popular Crathco® Bubblers™ and G-Cool™ cold beverage dispensers have been expertly manufactured in Thailand for the past 15 years. In 2007, Grindmaster-Cecilware moved into its current state-of-the-art facility in Rayong. The new facility allowed for expanded production capabilities and adherence to changing environmental and quality requirements. The company's Bubblers™ are considered the worldwide industry standard for pre-mix cold beverage dispensers.

The Thailand plant achieved several important milestones in 2011. The plant manufactured a remarkable 24,000 units, making 2011 one of the Thailand plant's most productive years to date. Additionally, ISO 9000 certification requirements were met. Receiving the ISO 9000 certification ensures strict adherence to quality processes that are required to do business with some of the world's largest companies. Also significant is the dedication of the Thailand-based employees to continue producing equipment and conducting business during the devastating floods that impacted much of Thailand in 2011. Grindmaster-Cecilware's success at its Thailand plant can be largely attributed to its hard working employees and the key management team that has been in place since operations began in Thailand in 1997.

Grindmaster-Cecilware™ manufactures a comprehensive line of quality beverage dispensing equipment for hot, cold, and frozen beverages and a complementary foodservice equipment line. Grindmaster-Cecilware™ has contributed significantly to the history and evolution of the beverage and foodservice industry. Our unwavering commitment to customer focused solutions drives innovation that is proven in the customer experience.
